

CHECKLIST FOR EASI EXERCISE

Go through these points for each one in turn. You have plenty of time.

Your task now is to discuss several points related to your own EASI result with your group. Therefore, bring out your report for this exercise. Remember, there are no right or wrong personality types; everyone is different. There are only different strengths and pitfalls. For development, it is essential to reflect on your own behaviors and understand the impact they may have on others. How are you, and how do you act? Of course, people are "more" than what is in the report, but behavior is often what others notice about you and is something you may have the opportunity to adjust over time if needed. Establish an order in the group where you discuss these points for each person one by one. You have plenty of time.

*How well you recognize yourself in the profile depends on how much you are of each type. If you're equally as much of each type, the recognition might be lower in the primary type. Use the overview to see if you have more recognition in any of the other types in that case.
